NORTH AMERICA

Techtextil North America is the Western Hemisphere’s premier event for the ever-growing technical textiles and nonwovens industry. The show provides an optimal platform to explore the various uses of modern textile technologies. Experts come together from all over the globe to share and expand knowledge; showcase innovations and technologies; and inspire new business and contacts. We strive to bring together all aspects of the industry, from research and development, through raw materials, conversion, treatment, and application. Techtextil North America continues to grow in popularity year after year. You won’t want to miss out on all of the opportunities that this event has to offer!

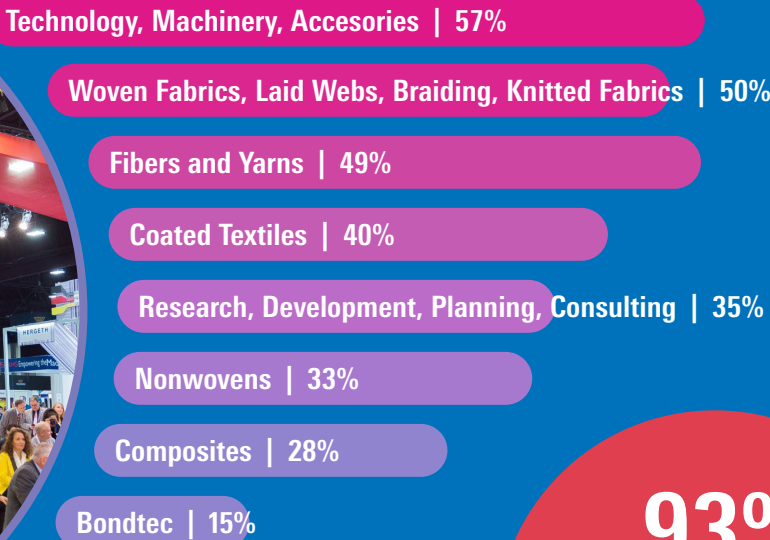

“I am here to check out the latest in coatings and innovations in wovens and nonwovens. The show is fantastic, I have been a couple of times. This year we have seen some really amazing things on the software side, as well as manufacturing floor automation techniques. We attend to check out the latest industry technology and see how our products can be brought into the future.”

—Greg Gimbell, Creative Director, Va Bien Lingerie
