## NORTH AMERICA

Techtextil North America, North America's only dedicated event for technical textiles and nonwovens, assembles all vertical aspects of the technical textile industry: from research and development, through raw materials and production processes and finally ending in conversion, further treatment, and recycling. Co-located with Texprocess Americas, the leading show in the Western Hemisphere for equipment and technology used in the development, sourcing and production of sewn products, this two-in-one event covers the entire textile supply chain, and attracts decision makers from across the industry spectrum. Showcase your latest innovations and products to thousands of qualified buyers, industry insiders, and potential partners!

**"Lots of quality people, a great restart. It was nice to be able to truly focus on meetings with people who are ready to make purchases. We will definitely be back next year!"**

— Bruce Perlon, Hahl Inc.
